

Dropbox installation instructions for Windows 7

- 1) Open your favorite web browser and go to <http://www.dropbox.com>
- 2) Click  [Download Dropbox](#)

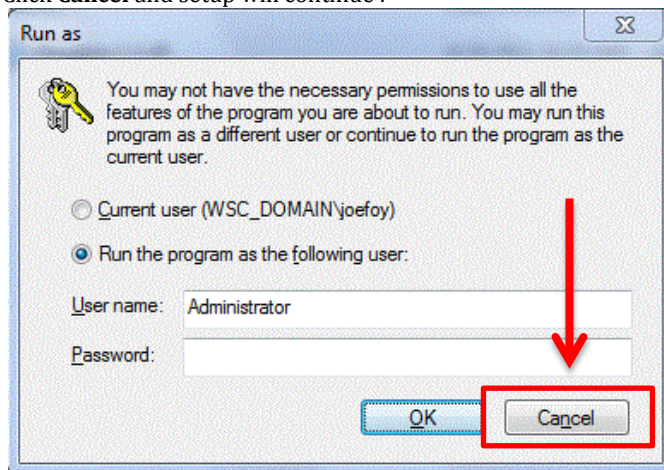

- 3) **Save the Dropbox application**

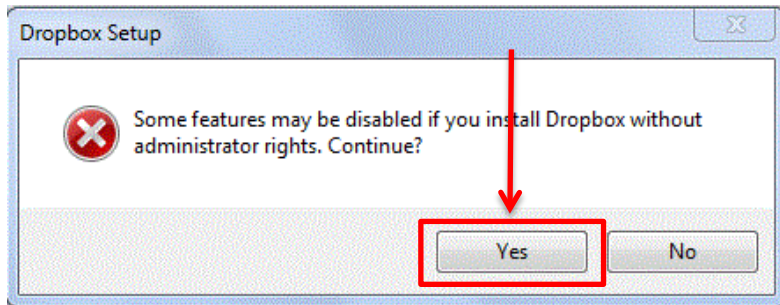

Click **Save File** when prompted.

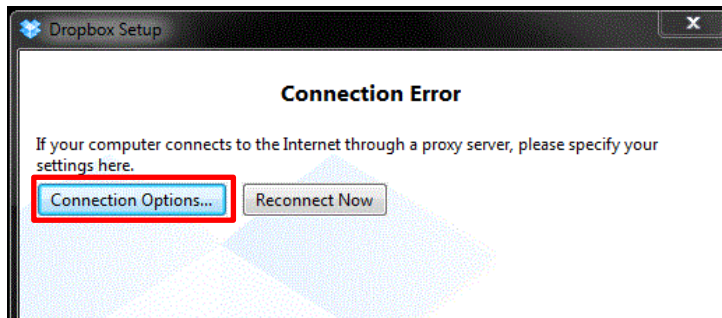

- 4) **Open the Dropbox Installer**
- 5) If you are using a WSU desktop computer, you will see a "Run as..." box appear. Click **Cancel** and setup will continue :

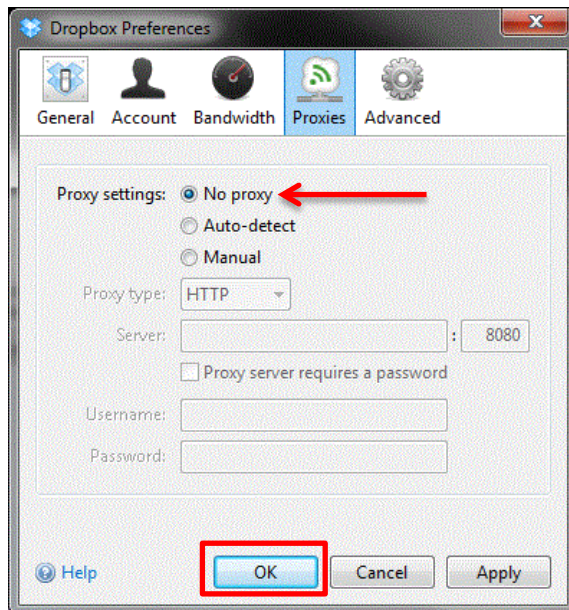

- 6) Another box will appear, saying some features may be disabled. Don't worry, it will still work OK!
Click **Yes** :

- 7) Now Dropbox will begin installing and you will see a progress bar. Once that is complete, it will perform a connection test. You might see the following message. Click **Connection Options...** :

- 8) That will open yet another window, choose **No proxy** and click **OK** :

- 9) Now simply follow the on-screen instructions. It will ask you to create a Dropbox account if you don't already have one (you may do this at <http://www.dropbox.com> as well as during the setup process)
- 10) View the short tutorial at the end of the setup process, and you're ready to start using Dropbox!
